

Letter of Recommendation for Student Scholarship

January 25th, 2021
University of Technology Sydney
PO Box 123
Broadway NSW 2007
Australia

To the UTS Scholarship Selection Committee:

I am writing a letter on behalf of Edrick Kesuma, an International Student who has completed UTS Insearch's Diploma of IT Program. Now, He is applying for the UTS Insearch to UTS Pathway Scholarship. Edrick is one of the strongest and friendly students I have had the pleasure of teaching in UTS Insearch.

I was his lecturer in several subjects that he has taken in the Diploma Program including Web Systems and Database Fundamentals; two of the more intensive subjects in the course that required students to absorb the material quickly and featured tough collaborative and individual assignments.

In the face of the courses' adversity, Edrick has been able to keep a cool head and work with his group members effectively to produce exceptional results in his assignments. He is very inquisitive and humble in the sense that he is not afraid to consult with me in his assignments and acts very respectful about doing so. He also achieved high grade in individual assignments. Once, an assignment on Web Systems required him to create complex scripts on bash and he demonstrated a very strong understanding in the language as seen on his code.

Moverover, Edrick also excels from a theoretical standpoint. He revealed consistency in achieving high to perfect scores in every weekly quiz and final exam he took. He is a fast learner and able to answer my cold calls in class with an extensive and complete response on the question. With his level of competence, there's no mistake that he would be one of the top scorers in the class, attaining an average of HD on my subjects.

Finally, I am thus convinced that Edrick is a hard worker and has a propensity to learn IT. He has a strong foundation for thinking in abstract ways to solve problems and will complete his journey at University of Technology Sydney with great achievements. He is a rare and gifted scholar who has my utmost support. Please let me know if there is any additional information, I can provide to support you in your decision-making process.

Sincerely,

Johnny Hizkia Siringo Ringo, BIT., MIMS
Lecturer of UTS Insearch Jakarta – Indonesia
(Subject JIWS001-Web System & JIDBF001-Database Fundamentals)
